PROJECTS

FinRight

- Led development of FinRight, a pioneering finance advisory platform integrating AI and expert insights. Spearheaded design, implementation, and optimization efforts to deliver personalized financial guidance. Achieved seamless user experience, privacy, and security while empowering individuals in managing their finances confidently.

Instagram-clone web

- Created a replica of Instagram using React.js for the frontend, Node.js and Express.js for the backend, and MongoDB for the database. Designed and implemented features such as user authentication, image uploading, feed generation, and commenting. Demonstrated proficiency in full-stack development and database management through this project.

Notes

- The Note project utilizes React.js framework to facilitate note creation, updating, and deletion functionalities. It offers a seamless user experience for managing notes efficiently. Users can easily create new notes, update existing ones, and delete those they no longer need. With React.js, the project ensures a responsive and intuitive interface, enhancing productivity in note-taking tasks.
